Reasons for Disposition

- 1) Achieving unrealized gains and stabilizing dividend level (total amount: 773 million yen)
- •We achieved unrealized gains with which the planned disposition price significantly exceeded the book value.
- •By transferring the asset in stages across three fiscal periods, we balanced large-scale renovation of owned properties with stable dividends.
- 2 Decreasing the commercial property investment ratio
- •Based on the management guidelines (revised March 2019), we will disperse risk for the time being by targeting a reduction of the commercial property investment ratio to less than 50%.
- •This will create opportunities for more leeway when considering acquisition of properties belonging to investment types other than commercial properties.
- 3 Use of disposition capital
- Disposition capital will be used for capital investment for the purpose of internal growth.

We aim to provide revenue that is stable over the medium to long term to investors and accommodate the best interests of investors
